# DORIAN

Il tavolo Dorian si inserisce nella zona living della casa connotandola grazie al suo design moderno e astratto. È composto da una serie di cornici metalliche di varie dimensioni, sfalsate tra loro e tenute insieme, quasi per assurdo, da dei frammenti di marmo, andando a costituire un basamento per un piano in cristallo molato. Come per tutti i prodotti Borzalino, esso può essere declinato in diverse dimensioni e materiali, offrendo grazie alle finiture del metallo e degli inserti marmorei infinite possibilità di composizione e personalizzazione.

**Basamento:** cornici metalliche di varie dimensioni verniciate o trattate galvanicamente con intarsi in marmo con appropriati sottopiedi in plastica. **Piano:** vetro temperato di 12mm con bordo molato.

EN The Dorian table is perfect for the living area of the house, characterizing it thanks to its modern and abstract design. It is constituted by a series of metal frames of various sizes, staggered and held together, almost by chance, by fragments of marble, forming a base for a ground crystal top. As for all Borzalino products, it can be available in different sizes and materials, offering endless possibilities of composition and personalization thanks to the metal finishes and the marble inserts.

**Base:** metal frames of various sizes lacquered or galvanized and with marble inlays with appropriate plastic glides. **Top:** in 12mm tempered glass with bevelled edge.

# VETRO GLASS VERRE

I vetri mesh sono una novità estetica e tecnologica. Molto particolari, sono l'unione di una rete metallica, argento o oro, all'interno di due strati di vetro di qualsiasi colore. Così da poter creare elegantissimi abbinamenti tra texture e vetro unito. In caso di rottura i reticoli di metallo trattengono i frammenti di vetro.

Mesh glass is an aesthetic and technological innovation. Very particular, they are the union of a metallic net, silver or gold, inside two layers of glass of any color. So you can create elegant combinations of textures and combined glass. In case of breakage, the metal lattices retain the glass fragments.
