# VETRO GLASS VERRE

I vetri mesh sono una novità estetica e tecnologica. Molto particolari, sono l'unione di una rete metallica, argento o oro, all'interno di due strati di vetro di qualsiasi colore. Così da poter creare elegantissimi abbinamenti tra texture e vetro unito. In caso di rottura i reticoli di metallo trattengono i frammenti di vetro.

Mesh glass is an aesthetic and technological innovation. Very particular, they are the union of a metallic net, silver or gold, inside two layers of glass of any color. So you can create elegant combinations of textures and combined glass. In case of breakage, the metal lattices retain the glass fragments.
